HM Group Foundation

ISSUE NO. 2 • APRIL – MAY 2026

Grant Application Procedure

To submit a project proposal to **the HM Group Foundation**, applicants must comply with the following steps:

1. **Project submission:** submit a formal application (either electronically or in person), accompanied by a detailed project description.
2. **Budget transparency:** provide an accurate line-item budget, clearly indicating any funding already secured from other sources.
3. **Eligibility:** grants are strictly reserved for legal entities. The project must be carried out by a duly registered organization holding an official operating license.

Send applications to: fondationghm@gmail.com *(addresses on the last page)*

> *"A company's sustainable success is measured not only by its financial results, but by the positive impact it leaves on people's lives."*

MESSAGE TO OUR COLLEAGUES

COMPLETED PROJECTS

01 Canapé-Vert Hospital

In March 2025, 13-year-old Joseph Shoob suffered a severe traumatic brain injury during school recess in Jacmel. Although he initially recovered and resumed his daily activities, his condition tragically worsened last December. Following a high fever and epileptic seizures, Joseph slipped into a coma that lasted more than three weeks. Due to the lack of specialized medical facilities in his region, an emergency transfer to Port-au-Prince became vital. Despite his parents' financial hardships, a wave of solidarity made his transfer possible.

The HM Group Foundation stepped in with a grant to Canapé-Vert Hospital to fully cover his hospitalization costs for two months and fund his medical treatment. Thanks to this decisive intervention, Joseph Shoob is now safe and sound back home. He is currently undergoing therapy alongside his family to help him return to a normal life.

CARE COVERED

2 months of hospitalization

02 Haïti TEC

In Haiti, access to education is a major driver of development. Haïti TEC, a local organization dedicated to youth education, has developed a sponsorship program aimed at providing 100 vulnerable young people with free access to high-quality technical and vocational training over a two-year period.

Committed to their future, **the HM Group Foundation** has partnered with this initiative by directly sponsoring 10 of these young people. Thanks to this two-year grant, these students will be able to acquire essential skills and prepare to enter the job market.

BENEFICIARIES REACHED

10 youths sponsored

03 Association Haïtienne des Citoyens pour le Développement

Changing lives by restoring sight: this is the challenge that a team of qualified doctors took on by uniting within this association. Their goal is to perform 50 pediatric eye surgeries to save children suffering from congenital cataracts from blindness.

Deeply moved by this medical emergency, **the HM Group Foundation** is actively supporting this initiative. The Foundation has awarded a grant to the Association Haïtienne des Citoyens pour le Développement (Haitian Citizens' Association for Development), led by Dr. Yamilee Cherubin, to fully cover the costs of these surgical procedures in Haiti.

BENEFICIARIES TARGETED

50 children

04 Ti Souf / Fondation IDEO

Thanks to the dedication of educator Maguy Clérié and psychologist Roseline Benjamin, children from disadvantaged backgrounds facing rampant insecurity manage to keep a glimmer of hope alive.

To support this vital initiative, **the HM Group Foundation** is funding the psychological support project titled "Pour une culture de l'amour et de la paix" (For a Culture of Love and Peace).

This funding provides the youth of Canaan with a safe, caring and welcoming place to gather. Support is also offered to local teachers, equipping them with the tools they need to provide emotional support to these children and shield them from the influence of armed groups.

05 APAAC

The Association pour la Prévention de l'Alcoolisme et autres Accoutumances Chimiques (APAAC) is a Haitian non-profit organization that has been combating substance abuse since November 1986. Its dual mission is to prevent and treat alcoholism and other addictions, with a special emphasis on youth.

Through information and awareness programs, APAAC helps the population adopt sustainable, empowering behaviors in the face of drug-related dangers. The organization also offers therapeutic support to help people battling addiction recover and reclaim a healthy life.

To support this commitment to young people, **the HM Group Foundation** has awarded a grant to APAAC to deploy targeted awareness campaigns across 40 schools.

BENEFICIARIES TARGETED

40 schools

06 SLG Academy

The SLG Academy (Saint-Louis de Gonzague) is a leading Haitian sports academy, distinguished by its excellent football program and its collaboration with the Haitian Basketball Federation. Active across the country, it energizes young people through the frequent organization of tournaments and competitions.

Committed to supporting this institution, **the HM Group Foundation** has awarded a grant aimed at strengthening four of the academy's essential pillars:

- staff compensation (coaching and administrative staff);
- academic follow-up for young athletes;
- medical care for injured or sick athletes;
- the purchase of equipment for all disciplines.

07 CNTS / U4WE

Located in Port-au-Prince, the National Blood Transfusion Center (CNTS) is the public institution managed by the Ministry of Public Health and Population (MSPP). Responsible for collecting, testing and distributing blood products in Haiti, the CNTS's primary mission is to ensure transfusion safety, organize blood drives and supply hospitals. Today, the institution faces major challenges tied to insecurity: the national network is heavily affected by a shortage of blood bags, and outbreaks of violence disrupt both the transport of medical supplies and the organization of blood drives.

In response to this humanitarian emergency, **the HM Group Foundation**, in collaboration with the United for Women Empowerment foundation, is providing its support by organizing a blood drive directly on the Group's premises.

Through this initiative, the HM Group reaffirms its civic commitment and social responsibility toward the community. Together, we bring a glimmer of hope: "Nou se Ayisyen, nou se yon sèl san" (We are Haitians, we are one blood).

MONTHLY SUPPORT

08 FONDAPS

The Fondation Notre-Dame du Perpétuel Secours (FONDAPS) is a non-profit organization based in Haiti whose mission is to educate a large number of children from various neighborhoods of the capital through sport. The foundation also aims to bring these young people together, allowing them to share their daily lives and thrive through their training.

The organization places special emphasis on sporting principles such as fair play, teamwork, and respect for coaches and opponents, convinced that these values reach beyond the field and into the daily lives of these young people. FONDAPS firmly believes that instilling a sense of civic duty, respect for others and a spirit of fellowship will encourage them to become responsible citizens.

To accompany the organization in its mission, **the HM Group Foundation** provides monthly support to cover its various administrative needs.

09 Saint-Louis-Marie Grignion de Montfort Parish

Located in Delmas 31, Port-au-Prince, the Saint-Louis-Marie Grignion de Montfort Parish is a cornerstone Catholic community in the capital. Founded in 1999 and entrusted to the Montfortian Fathers, the parish is known for its vibrant spirit, particularly during its patronal feast celebrated every April.

To support the organization of this major event, **the HM Group Foundation** provided a financial contribution specifically earmarked to cover sound system expenses. In addition to this one-time support, the Foundation provides the parish with a monthly donation of 20 cases of pasta.

MONTHLY SUPPORT

20 cases of pasta

SPONSORSHIP

10 Karol-Ann Vilaire Dance Academy

The Karol-Ann Vilaire Dance Academy will present its 2026 Annual Show on Saturday, June 20, 2026, at the Karibe Convention Center. This special edition will mark 25 years of artistic excellence with an exclusive production inspired by “The Lion King.” Each year, this event draws a large audience, highlighting the talent, hard work and discipline of the many young dancers trained at the institution.

Beyond its artistic mission, the academy operates at the heart of a community often facing severe hardship, including illness, lack of medical care, food insecurity among the elderly, and parents’ inability to pay for their children’s education.

In response to these realities, and even more so in the current context of insecurity, the institution is actively engaged in social initiatives for the neighborhood’s most vulnerable residents. **The HM Group Foundation** provides its valuable support, enabling the academy to carry out these outreach activities, which include:

- covering tuition fees and distributing school supply kits;
- organizing psychological support sessions (trauma management) as well as personal and dental hygiene workshops;
- integrating vulnerable youth into the dance school, with full coverage of their uniforms and stage outfits.

ANNUAL SHOW

25 years of excellence

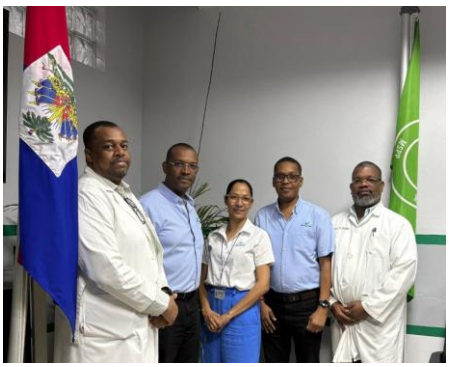

PROJECT VISITS

11 Hôpital Universitaire la Paix

A cornerstone of public healthcare in Haiti, the Hôpital Universitaire de la Paix (HUP) is now the main affordable medical option for Port-au-Prince's vulnerable population since the closure of the General Hospital. In addition to its healthcare mission, HUP plays a key role in training the next generation of medical professionals.

A site visit revealed the robustness of its clinical organization and its remarkable technical autonomy (on-site oxygen production, water treatment and waste management). The facility also benefits from the support of partners such as the International Red Cross and Barbancourt for the modernization of its infrastructure.

To support the outstanding work of the healthcare teams, **the HM Group Foundation** officially handed over a major donation of medical and protective equipment to the institution, including more than 14,000 gowns, 130,000 masks and 1,500 protective coveralls, along with essential medical supplies such as scrubs and Betadine.

DONATION DELIVERED

14,000+ gowns
130,000 masks
1,500 coveralls

12 Association Haïtienne des Citoyens pour le Développement

The team of **the HM Group Foundation** visited the Association Haïtienne des Citoyens pour le Développement project, which focuses on performing 50 pediatric eye surgeries.

By attending a two-hour procedure (including preparation time), the team witnessed firsthand the exceptional commitment of the medical team. This deeply moving experience highlighted the immense dedication and humanity of these healthcare professionals. By generously giving their expertise and time, these doctors are transforming lives and restoring hope and a brighter future to the most vulnerable families.

Message to Our Colleagues

Dear colleagues,

We would like to thank our team members who are already committed, and we invite everyone to take an active part in our future initiatives.

It is through your daily contributions that we will embody the change we all wish to see for this country.
